

The Solution Providers

Assembly Tools & Precision Fastening

Quality and performance on the toughest jobs

DC ELECTRIC NUTRUNNERS

Ingersoll Rand offers a complete range of DC fastening tools in straight, right angle and (a unique) push-to-start configurations.

Ingersoll Rand DC fastening tools have built in torque transducers. The torque delivered by the tool is dynamically measured by the transducer and through a closed loop micro processor control, the tool is shut off when the desired torque is achieved. Angle control is attained through a resolver interfaced with the closed loop system. Advance strategies such as fastening to yield are achieved through algorithms.

The new IR QE-IC series fastening systems are the realization of an investment in innovation and technology that promises and delivers an unparalleled level of performance. The new QE-IC systems perform dramatically better than existing closed-loop DC platforms in improving productivity, reducing cost of ownership and maintenance, and offering a proven means of tightening critical assemblies.

TOOL

Four motor platforms named the QE2, QE4, QE6 and QE8 include tools in angle, inline, push-to-start and pistol configurations.

Productivity

- Faster speeds at torque
- Improved accuracy with Sine Drive technology
- Programmable momentary switch
- Modular designs offer optimum flexibility

Ergonomics

- Lightweight design
- Compact package
- Comfortable grip surfaces and smooth contours
- Low-force trigger and rotary reverse switch
- Digital Link between tool and controller
- One-piece rugged chassis
- Improved gear and cable life
- Non-contacting switches

QM SERIES SPINDLES

QM Series DC spindles are the workhorse of your multispindle application. With four platforms that provide broad torque and speed coverage, Ingersoll-Rand QM spindles deliver the highest level of performance, durability, and reliability in the industry. The QM3, QM5, QM7, and QM9 platforms are so durable, in fact, that we stopped testing them after three million fault-free cycles.

Model	Max. Torque Range Nm	Rec. Torque Range Nm	Speed rpm	Drive Size in
QM3S() 008()	8	2-6	1,382	3/8" or 1/2"

INSIGHT IC12D/IC12M CONTROLLERS

The new Ingersoll Rand Insight IC1D controllers give you full closed-loop control in an industry-leading compact size. With features like a VGA colour display and intuitive programming interface, the IC1D units provide unmatched performance and value.

- Power switch is enclosed in rubber boot for protection.
- Parameter Transfer Key (PTK) enables quick upload, recovery, transfer, and storage of configuration sets.
- Removable cover provides easy access to connections and terminals, even when the unit is installed.
- Program up to eight basic fastening configurations and access all 256 stored in memory.
- Professional 1/4 VGA 216 -colour display is visible from 20 ft (6.1 m).
- Standard Ethernet and I/O connections optimize communication and line integration.
- The controller has 1,000 cycles of end-of-run automatic data storage.
- Dual-mode power supply : 90 - 120 VAC and 200 - 240 VAC.
- Internal maximum ambient operating temperatures of 0°- 50°C (32°- 122°F) ensure reliable use in demanding conditions without risk of overheating.
- Easy installation and set-up with convenient bracketing system.
- Comfortable and tactile membrane facilitates easy programming and screen navigation.
- Extruded aluminium cooling fins.

IC12D SELECTION GUIDE

IC12D

IC12M

ICS SOFTWARE

Paired with an Insight IC12D or IC12M controller and a computer, our ground breaking ICS Software Suite makes it possible to more precisely control and monitor your fastening process. Optimizing your system is as simple as selecting one of four packages.

ICS CONNECT

ICS Connect provides operators with the ability to access and program basic fastening strategies, as well as view cycle data with a single IC12D or IC12M controller via a one-to-one Ethernet connection, ICS Connect is supplied standard with all IC12D and IC12M controllers.

ICS NETWORK

ICS Network enables programming of multiple IC12D and IC12M controllers connected through a local area network (LAN) or direct connection. This option also allows operators to program advanced fastening strategies including yield and prevailing torque control.

ICS MULTISYNC

The ICS MultiSync package facilitates set-up and control of multispindle systems consisting of up to 100 spindles in groups of up to 40 spindles. This package also offers advanced multispindle fastening strategies, remote monitoring, and data archiving.

ICS ENTERPRISE

ICS Enterprise offers advanced programming and management of a network of upto 500 IC12D or IC12M controllers using QE tools, QM spindles, or multispindle systems. Also enables ODBC-compliant database archiving, searching, and statistics processing.

QX SERIES CORDLESS PRECISION SCREWDRIVER

Not Just Torque Control...Total Control

Control

- Multi-function display module and password protected keypad offer quick setup and visual feedback—right on the tool
- Eight user-programmable torque/angle/speed configurations allow one tool to do the job of up to eight, reducing tool costs and workspace clutter
- Closed-loop transducer control ensures quick assembly, precise torque and accurate, traceable results

Comfort

- Compact, cordless assembly tool gives you the freedom to work without constraints
- Lightweight, low-reaction, ergonomically balanced design maximizes operator comfort
- Safe and clean operation – no cords, air hoses or brush dust

Communication

- Wireless communication option delivers process control with I/O, automatic configuration switching and real-time data archiving for up to 10 tools via Process Communication Module (PCM)
- Plant-wide networking manages both process control inputs and feedback data using Ethernet, Fieldbus or I/O, complete with data archiving

QX SERIES PROCESS COMMUNICATION MODULE (PCM)

Each Process Communication Module provides wireless data transmission for upto 10 tools or enables tool integration into plant process control systems.

Power Cord	BC10-CORD-US	IC-PCM-1-IN	IC-PCM-2-IN
Tool Connections	Wireless tool connections	10	1
Software	ICS Connect software	•	•
Power Supply	120V AC input, 5V DC output	•	•
Communication	Ethernet to ICS	•	•
Fieldbus Options	Ethernet/IP, DeviceNet, Interbus-S, Profibus, Modbus-TCP		•
Protocols	Open Protocol, Ethernet EOR, Serial EOR		•
Printers/Devices	Serial RS232, bar code, label printing		•
I/O	8 inputs/8 outputs, with behaviour assignable through ICS software, operates at 24V DC		•
I/O Power Supply	120V AC input, 24V DC output		•
Indicators	Power ON, System Ready, Wireless Activity, Ethernet Activity	•	•
Ambient Operating Conditions	0-50°C, 20/90% non-condensing humidity	•	•
Enclosure	IP52 mounted in upright vertical position	•	•
System Weight	3.0 lb (1.4 kg)	•	•
Overall Dimensions	11.5 in x 4.1 in x 8.3 in 291 mm x 103 mm x 210 mm	•	•

Process Control

ASSEMBLY AUTOMATION

MULTI SPINDLE NUTRUNNERS

Multi Spindle Nutrunners require a thorough understanding of customer requirements and the mating of equipment with the customer's assembly lines. Functions at which Ingersoll Rand's expertise has been demonstrated through an installation base of several thousand spindles.

Some of the assembly solutions manufactured recently by Ingersoll Rand are shown on this page.

PNEUMATIC MULTI SPINDLE NUTRUNNERS

Pneumatic Multi Spindle Nutrunners are recommended for less critical joints. These units are available in stall, minimum torque sensing and shut off versions.

DC MULTI SPINDLE NUTRUNNERS

DC Nutrunner are recommended for simultaneous and precision tightening, can do advance fastening strategies such as Angle Control, Yield Control Retorque, customise sequence tightening etc.

4 Spindle air Nutrunner for Cylinder Head Tightening

7 Spindle air Nutrunner for Crank Case LH & RH Tightening

12 Spindle DC Nutrunner for Cylinder Head Tightening

18 Spindle DC Nutrunner for Cylinder Head Tightening

2 Spindle DC Nutrunner for Connecting Rod Tightening

3 Spindle DC Nutrunner for Spark Plug Tightening

Single Spindle with Servo Controlled X-Y Axis Movement for Auto Sequenced Tightening of Cylinder Head

8 Spindle Machine Mounted DC Nutrunner for Fully Automated Operation (tact time = 6 sec.) for Compressor Head Tightening

C-Frame Mounted 8 Spindle for Intake Manifold Tightening

4 Spindle for Wheel Nut Tightening

IC12M

IC12D

Features of Ingersoll Rand Controllers for Fixtured Applications

- Modular plug and play construction.
- The programming is user friendly and does not need any special skills.
- Multi level password protection to prevent unauthorised program access.
- Fault indication & easy trouble shooting
- Inbuilt tightening strategies
 - Torque Control
 - Angle Control
 - Yield Control
 - Prevailing Torque Control
 - Retorque
 - Back-out Control
 - Drag Torque
- Upgradable software

ANGLE NUTRUNNERS

There's much more to an assembly application than merely putting wrench to bolt. It's an intricate matter of linking tool users and fasteners to deliver an uncompromised combination of accuracy, durability, speed, and ergonomics.

The solution: Ingersoll Rand precision air nutrunners. Our newly designed precision air nutrunners are compact, lightweight, quiet, and durable enough for the toughest high-volume applications, yet still deliver the speed and accuracy you need. The QA4, QA6, and QA8 Series tools are easy to maintain – which means less downtime – and are fully configurable in straight or angle configurations, shut-off or stall, with fixed or floating spindles, and in a variety of drive sizes upto 225 Nm.

ANGLE SHUTOFF NUTRUNNERS

*Note: Highest recommended torque setting for assembly line applications. Exceeding the highest recommended torque setting may result in reduced tool life.

INLINE NUTRUNNERS

Configurable to your application - don't see your configuration? Contact your Ingersoll Rand representative for custom options

Longer service life through precision machining and heat treatment

Precision shutoff clutch tested to 1 million cycles without failure

Ergonomic grip for operator comfort

Ideally positioned reverse ring for ease of use

Quiet operation

Easy servicing with spanner wrench

Externally adjustable precision shutoff clutch for consistent joints; ISO 5393 tested

Powerful non-lube motor

Standard 4" inline spindle provides 19 mm of float to accommodate faster rundown in fixtured applications

Multiple mounting flange options provide flexibility to customize the application (see below)

REACTION BAR

STANDARD REACTION BAR

Reaction bars are recommended with angle nut runner (QA & QE Series) where torque is more than 40 Nm. Reaction bar with angle nut runner is the most effective and economic solution of taking reaction out of an operator hand.

Standard reaction bar can be used for applications where torque requirement with angle nutrunner is more than 40 Nm and less than 150 Nm.

Reaction Bar Assembly GEA 15 - K48W (Consist of a clamp and a Rod)

Typical Mounting of Reaction Bar

Clamp

Rod

Performance figures are at 620 kPa (90 psi) air pressure

QUICK MULTIPLES

Quick multiples consist of pre-engineered modular component designs that allow quick quoting, manufacture, and delivery of more common fixtured fastening solutions for up to six spindles. Depending on the application, vertical, horizontal, or rotating horizontal systems can be assembled with easily customized handles, displays, fixtures, and integrated handling devices for optimal operator ergonomics and performance.

- Pre-Engineered Modular designs
- Quick Quoting and Delivery
- Vertical, Horizontal & Rotating Horizontal designs
- Upto 6 DC or Air spindles per system
- Configurable handle options configurable operator interface module
- Used with world class QE, QM & QA spindles and ICD & M Controllers Integrated handling devices

Modular design provides for easy customization of open- or closed-frame fixtures in vertical, horizontal, or rotating horizontal configurations.

Mounts are available in several options that adjust to give operators the most ergonomic position, visibility, and control possible.

Handle module provides multiple switch options based on the application.

Customizable interface provides the control and feedback you desire. Standard LED display shows individual spindle and master OK/NOK signals.

Modular design offers flexibility for easy customization, rapid quotes, and lead-times.

World-class tools deliver accuracy and durability to maximize your line's productivity.

- QM and QE Series
- QA4, 6, 8 Series

Cable tray provides secure routing path, which keeps cables safe and out of the way, and reduces sharp bends.

Multiple suspension and torque reaction options:

- Balancers
- Torque tubes
- Articulating arms
- Custom devices
- Jib cranes
- Pneumatic suspension

Heavy-duty bearing delivers smooth rotation and adjustable stops for upto six spindles and provides for an ideal cable exit.

Circular handle allows rapid positioning of sockets on bolts.

Mounting plates can be quickly and easily machined to the exact job specifications.

TORQUE TUBES

- Available in three torque capacities – 100 Nm, 250 Nm and 500 Nm
- Linear bearings for effortless vertical travel and maintenance-free operation
- Lifting capacities of 27 and 182 Kg
- Four Delrin wheels for torque reaction and side loading in all directions
- Adjustable lengths every 2 inches to eliminate the need for extension tubes
- Available bolt-on attachments for tool holders and suspension

TORQUE TUBES

Model	Lift Nm	Capacity @		Travel mm
		100 psi kg	Weight lb (kg)	
IRZ-TT-100 SH	100	27	18	508
IRZ-TT-250SH	250	27	23	610
IRZ-TT-500*	500	182	75	914

*Carriage mount option only; custom tool holder required. Contact factory for details.

TOOL HOLDERS

Part Number	For Use With	Description	"D" Dimension mm(in)	Weight lb(kg)
52000	IR2-TT-100SH	Fixed (2 axis) horizontal/vertical	4.82 (122)	2.30 (0.90)
52100	IR2-TT-250SH	360° (3 axis) swivel	5.38 (136.7)	5.00 (2.27)

QTA TORQUE ARMS

Ingersoll Rand QTA bench-mounted torque reaction arms are constructed of lightweight aluminium and are available in a variety of torque capacities, ranging from 10 to 150 Nm. They include Ingersoll Rand spring-loaded, die-cast aluminium balancer for impressive strength and reduced weight.

Spring balancer adjusts easily and offers effortless vertical movement

Simple, proven design for trouble-free set-up and dependability

Anodized aluminium body delivers toughness in a lightweight design

Chrome plated pole paired with a self lubricating bearing provides unmatched durability

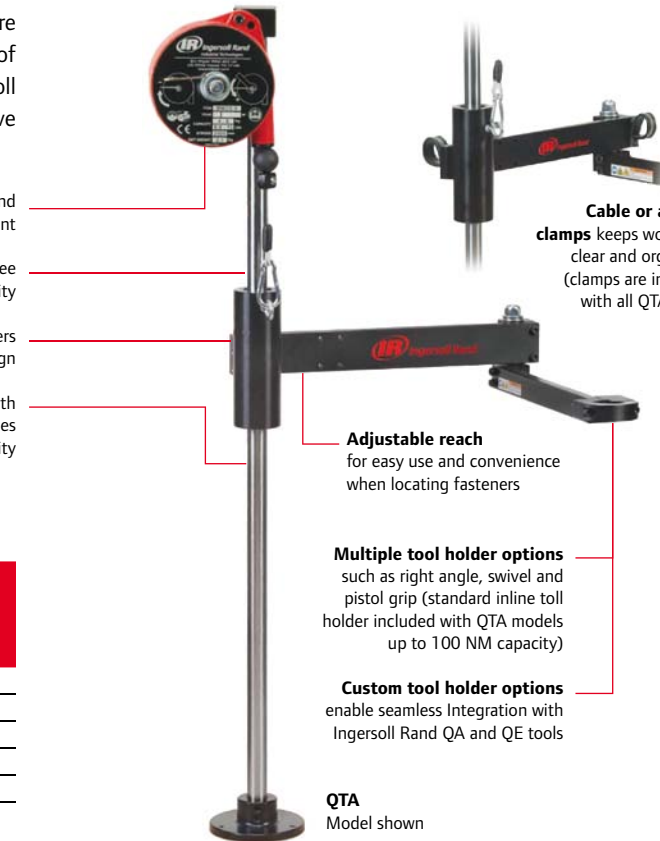

Cable or air line clamps keeps work area clear and organized (clamps are included with all QTA arms)

Adjustable reach for easy use and convenience when locating fasteners

Multiple tool holder options such as right angle, swivel and pistol grip (standard inline tool holder included with QTA models up to 100 NM capacity)

Custom tool holder options enable seamless Integration with Ingersoll Rand QA and QE tools

QTA Model shown

BENCH-MOUNTED QTA TORQUE ARMS*

Model	Max torque capacity Nm	Max weight capacity (kg)	Max working reach in (mm)	Vertical travel mm	Overall height mm
QTA010	10	1.20	381	330	706
QTA020	20	2.27	508	368	808
QTA040	40	2.95	635	445	1008
QTA100	100	3.63	762	445	1008
QTA150	150	4.54	1321	559	2000

NOTE: QTA150 is adjustable to mount to the floor or a bench and does not include a tool holder

FLOOR-MOUNTED TORQUE ARMS

When high torque fastening is required, Ingersoll Rand has two floor-mounted, air-enabled arms from which to choose with 270 and 475 Nm capacities.

Safety stop eliminates over extending arms

Generous arm length makes QTA ideal for assembly line applications

Custom tool holder options permit use with Ingersoll Rand QA and QE tools

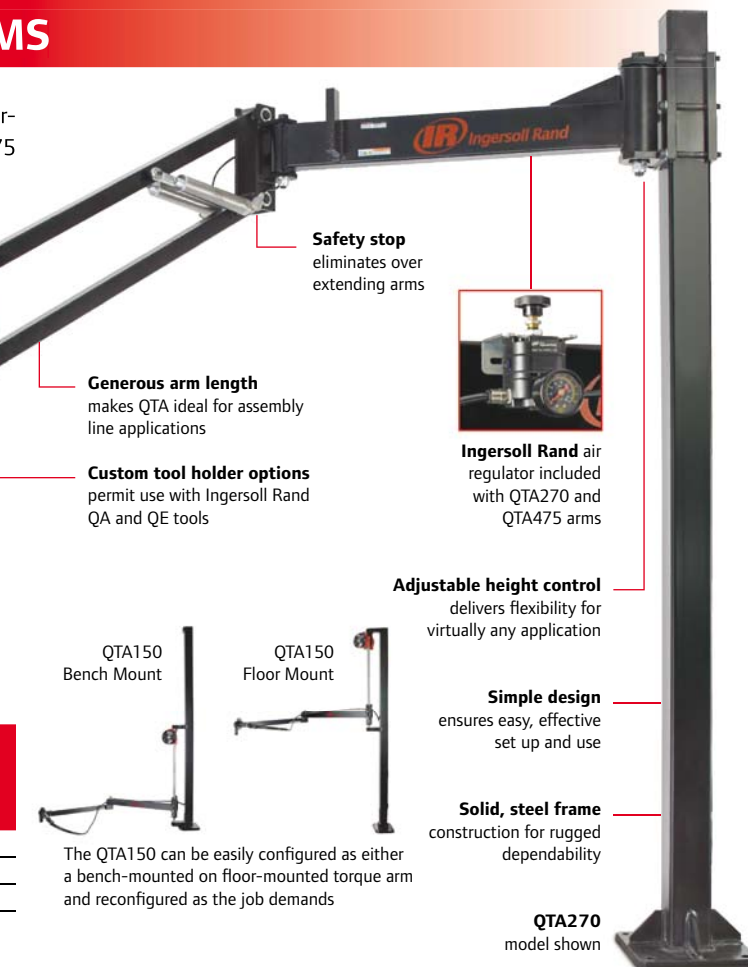

Ingersoll Rand air regulator included with QTA270 and QTA475 arms

Adjustable height control delivers flexibility for virtually any application

Simple design ensures easy, effective set up and use

Solid, steel frame construction for rugged dependability

QTA270 model shown

FLOOR-MOUNTED QTA TORQUE ARMS*

Model	Max torque capacity Nm	Max weight capacity (kg)	Max working reach in (mm)	Vertical travel mm	Overall height mm
QTA150	150	4.5	1321	559	2000
QTA 270	270	10.0	1524	477	2000
QTA 475	475	23.0	2007	590	2000

The QTA150 can be easily configured as either a bench-mounted or floor-mounted torque arm and reconfigured as the job demands

*Note: Arms above do not include tool holders (please refer Ingersoll Rand QTA catalogue for availability of various tool holders)

IQ^{V20} AND IQ^V SERIES CORDLESS TOOLS

As an industry leader for more than 100 years, Ingersoll Rand has a strong understanding of the jobs, impact tools are called on to perform. Our engineers know that a cordless impact has to do the job, do it fast, do it every time. Developed to perform, our cordless tools are best in industry which professional technicians will come to rely on in the shop and in the field.

Ingersoll Rand IQ^{V20} Series™ and IQ^V™ cordless tools are specifically designed for vehicle services, industrial maintenance and manufacturing applications. These tools make quick work of tough jobs that the professional technician does every day – something that until now, only an air tool could do.

OIL PULSE TOOLS

Ingersoll Rand represents Uryu Seisaku Limited of Japan, the leaders in pulse tool technology. In pulse tools the mechanical impact mechanism is replaced by a hydraulic mechanism improving repeatability as well as reducing noise and vibration. The range encompasses straight, pistol grip and right angle configurations. Torque capabilities from 2.5Nm to 850Nm cover most assembly applications.

OPEN-END WRENCHES

Open-End wrenches are a fast & accurate solution for tube nut tightening. UOW-11 series are stall torque type tools and UOW-T60 series are mechanical shut-off type tools with external torque adjustment. An all gear drive mechanism provides precise torque, silent operation and longer tool life.

STRAIGHT TYPE

Model	Torque Range Nm	Free Speed rpm	Overall Length mm	Weight kg	Hex Size of Gear Socket () Standard mm	Average Air Cons. cfm

SCREWDRIVERS

Ingersoll Rand dominates the industry with the most comprehensive range of pneumatic screwdrivers. Shut-off, slip & positive clutch models are offered in different speeds in straight, pistol grip and right angle configurations.

The auto shut off range is recommended for applications requiring torque consistency. Shut off tools also minimise component breakage during fastening of fragile plastic & bakelite components.

Auto start screwdrivers minimise operator fatigue, allow faster operations and reduce air consumption.

Right-angle screwdrivers have been designed for applications with limited access and are more comfortable on high torque applications.

QI IMPACT SCREWDRIVERS

Qi Series air impact screwdrivers are designed with the end user in mind. Best-in-class ergonomics allow the operator to focus on the job, not the tool, and the extremely durable impact mechanism delivers high speed reactionless power capable of meeting the rigorous demands of high cycle rate assembly applications.

The end result: a tool that helps you maximize productivity.

IMPACT WRENCHES

Ingersoll Rand brings over 60 years of experience to impact wrench design and manufacturing. Ingersoll Rand impact tools are renowned world wide as the most reliable and tough tools available. The twin hammer mechanism developed by Ingersoll Rand provides unmatched durability and performance and has been the industry standard for several years.

Torque figures shown in the catalogue represent torque achieved under test conditions. Due to joint losses (see fig.) the actual torque achieved on a joint will vary. It is therefore recommended that impact wrenches be selected after actual trials wherever possible.

All other models	1/4"	10 mm

FASTENING COUNTER

Ingersoll Rand fastening counter model FPY-1100 is a pokayoke solution for tightening a preset number of fasteners. The unit counts down the number of bolts or nuts fastened by oil-pulse tools or screwdrivers modified to sense the back pressure from these tools. This function automatically makes sure of correct fastening of the specified number of bolts or nuts. A clear LED display, go/no lights and buzzer help avoid human errors and common fastening mistakes. Can also be used with click type torque wrenches. Screwdrivers & nut runners.

Oil pulse tools or impact wrenches to be used with FPY-1100 must be modified to sense air signal through exhaust outlet.

PLEASE SPECIFY "TM MODEL" WHEN ORDERING THE TOOL e.g. UX-700 (TM)

QC AIR TOOL QUALIFIER

Process Qualification

- Provides OK/NOK signal based on air flow rundown signature.
- Verifies batch/gang count and cycle time completion.
- Stores two (2) parameter sets for different joint applications.
- Optional hose light gives operator visual feedback right at the tool.
- Total cycle count alarm indicates when preventive maintenance is required.

Error-Proofing

- Detects rehits, cross-threads, and early throttle release.

Easy Setup

- Quickly leads you through the setup procedure with simple menu prompts.
- Process Flow Control and Alarms.
- I/O standard. Can interface with alarms or process control devices.

Shutoff Capability

- Solenoid Valve provides shutoff tools.

Tool Compatibility

- No tool modification required (such as special valves, or porting).
- Works with shut off & standard Pulse tools, impacts 3/8" & ½" Sq. dr. tool & QA 4 nutrunners (Not compatible with QA6 & QA8 Series of nutrunner)

Model	Tool Compatibility
QC 100-S-K	Non shut off pulse tools, 3/8" & ½" impact tools
QC 200-S-K	Shut off pulse tools, QA 4 clutch shut off nutrunners

EXTA SERIES EXPERT TORQUE ANALYSER

The new Ingersoll Rand EXTA series torque analyser is designed for use with an extensive new range of transducers to measure and record the torque output of all types of fastening tools, including pulse wrenches.

The EXTA torque analyser has full statistical capability, and data can be downloaded to a computer or printer via RS-232 port. A full line of joint-kits facilitates testing of fastening tools in the tool crib, quality lab or on the line. The EXTA is portable and is capable of reading in four different modes to cover a variety of tools such as standard air tools, pulse tools and click wrenches.

- Monitors torque, angle, time and pulse count
- Reads in peak, click, pulse, or track mode
- Stores 200 time-stamped readings
- Auto-recognition of Smart transducers
- Seven units of measure
- Selectable filter frequencies
- DC tool calibration via ICS software
- Selectable power-save settings
- Selectable languages include English, French, German, Italian and Spanish

TYPICAL SCREEN

Number of pulses (pulse mode only) → 9

Torque reading → 24.18 Nm

Tightening direction → [Symbol]

Transducer information → [Symbol]

Total time torque is applied (cycle time) → 2.970

Cycle end time → 0.136

Filter frequency → 1536 Hz

Press the corresponding number on the keypad to access the features displayed on the bottom row of the screen.

ROTARY TRANSDUCERS FOR USE WITH EXTA

Drive Size	Transducer Range	Rotary* Transducer (Torque)	Smart Series Torque & Angle
Nm			
1/4" Hex	0.10 - 2	TR2H4	—
1/4" Square*	1.0 - 20	TR20S4	TRDA20S4
3/8" Square	3.8 - 75	TR75S6	TRDA75S4

Radio Frequency Torque Wrench System

- Wireless error-proofing (Pokayake) torque system
- FHSS technology with universal 2.4 GHz frequency band
- Wrench ID transfer functions to establish bolt tightening traceability
- Easily change frequency with wireless setting box (optional)

QLFH100N4

T-FH256MC

R-FH256

SB-FH256

I/O-FH256

FH Torque Wrench Examples

QLFH

FH transmitter mounted on QL

Model
QLFH25N
QLFH50N
QLFH100N4
QLFH140N
QLFH200N4

SPFH

FH transmitter mounted on SP

Model
SPFH38Nx14
SPFH38Nx27

TRANSMITTER

All kinds of frequency groups (256 kinds) can be set in one transmitter.

Model	Description
T-FH256MC	Transmitter for FH256MC
T-FH256MC-LS	Transmitter for LS type wrench

Note : T-FH256MC-LS is a wireless transmitter module to install on LS version torque wrenches.

RECEIVER

All kinds of frequency groups (256 kinds) can be set in one receiver.

Model	Specification
R-FH256	Output : No-Voltage contact output (1a) RS232C
R-FH256	Size : W150 x D210 x H51 (mm), Weight 1.7 kg
R-FH256	Power : AC100V-24V, 47-63Hz

Standard Accessories : Dipole antenna

SETTING BOX

Wireless setting device for FH transmitter and receiver.

Model	Specification
SB-FH256	Input: RS232C, Power : DC9V

Standard Accessories : Dipole antenna

MULTI I/O BOX

Manage 4 tightening signals from receiver and output to external device.

Model	Applicable Model	Specification
I/O-FH256	R-FH256	Output : No-Voltage Contact output (1a) x 4 Power : AC 100-240V

CNA-4mk2

POKA Patrol (Count Checker)

- Torque tightening verification counter
- Manages signals from LS of FH torque wrenches
- Up to 4 wrenches can be controlled at one time (in succession)

Model	CNA-4mk2
Count Display	2 digits, 7 segments, LED
Judgment Function	Domed shaped Lamp (OK/NG)
Count Input	Cable terminals x 4
Maximum Preset Counter	99
Work Setting Availability	4 sets max.
Judgement Output	OK : Green Lamp NG : Red Lamp + buzzer (4 patterns)
Mode Exchange Setting	Normal mode Multiple mode (maximum 4 torque wrenches cab be connected)
Electric Power Supply	Ac100-240V 50/60 Hz
Size and Weight	W150 mm x D210mm x H51 mm, 1.5 kg

DB/DBE/DBR

Dial Indicating Torque Wrench

- Memory pointer for easy torque reading
- Ideal for torque measuring and quality check application

Ingersoll Rand's Other Products Solutions

ARO FLUID PRODUCTS

Our fluid products provide the industry-leading ARO brand air operated diaphragm and piston pumps for a broad spectrum of fluid transfer applications. Also count on us for high quality pneumatic valves, cylinders, motion control components and FRLs. The focus is on reducing downtime and increasing return on investment by extending the life of your equipment and improving productivity.

ARO Diaphragm Pumps

- Patented "unstallable" air valve and "quick-dump" exhaust valves allow for ice-free operation and maximum operating efficiency
- Multiple materials of construction for chemical compatibility and flow rates ranging from 17.4-1,041 L/min (4.6-275 gpm)

ARO Piston Pumps & Packages

- Pumps for fluid viscosities ranging from 500-1,000,000 cPs including oils, paints, inks, sealants, caulking & more
- Multiple package seal options, including leather, UHMW-PE and PTFE for chemical compatibility
- Optional Ultra-Coating for tubes and plungers reduces abrasion and scoring

ARO Lubrication Equipment

- Piston and diaphragm pumps and packages specifically designed to handle all types of oil, grease, and specialty-type fluid applications
- Specialty pumps for antifreeze/water mixing, solvents transfer, calcium chloride tire fill and high-pressure wash
- Diaphragm pumps meet U.L. 79 specification code for fuel related applications

ARO Filters, Regulators & Lubricators (FRL's)

- Best-in-class air flow with flow rates from 0.9-50 m³/min (32-1,770 scfm)
- Modular design for 1000 – 3000 series facilitates easy installation and maintenance
- Positive thumb-locking switch on polycarbonate bowls for enhanced safety

ARO Pneumatic Valves & Cylinders

- Valves with flow rates up to 7.8 Cv (280 scfm) and cylinders with stroke lengths up to 250 mm (9.9")
- 2-, 3- and 4-way valves with electrical, manual, mechanical & pneumatic actuators and various body styles to fit all applications
- NFPA interchangeable, round repairable and disposable, square and round compact cylinders to accommodate different environments

MATERIAL HANDLING

Ingersoll Rand has been serving the material handling needs of the toughest industries around the globe for nearly a century. We apply R&D expertise to introduce new products and technologies which integrate the latest electronics and controls. By using Ingersoll Rand solutions you can expect improved productivity and operator performance as well as reduced downtime.

Air, Electric & Hydraulic Utility Winches

- Available in a wide range of capacities from 300-10,000 kg (660-22,000 lbs)
- Top reliability with our Liftstar®, Pullstar®, BU, EU, Force 5® Third Generation and Infinity winch series
- Lifting, pulling and positioning applications for the world's toughest industries

ManRider Winches

- Available in capacities from 150-3,125 kg (330-6,875 lbs)
- LS2-150RLP, FA150KGi, Force 5® Third Generation and Infinity winch series ensure your personnel gets lifted safely
- Meeting the toughest personnel lifting requirements in the offshore industry

Balancers & Air, Electric & Hydraulic Hoists

- Balancers, CLK, MLK, HLK, ARO, Quantum, Liftchain®, Herculink® and BOP Handling Systems that can handle load capacities from 0.12-200 tons
- Air balancers with float to position load by hand for precision spotting
- Hoists for high-speed production, food grade applications and the harshest industrial, underground and marine environments

Manual Hoists

- Manual and lever chain hoists from 0.5-25 ton capacity
- Overload protection to reduce downtime and repair costs
- Versatility to be used in construction, maintenance and rigging applications

Workstation Bridge & Jib Cranes (Support Structures)

- Overhead and floor supported enclosed track workstation cranes with <1% rolling resistance and articulation for maximum ease of use
- Standard low profile enclosed track rail jib cranes with 220 and 360 degree coverage
- Standard and custom applications with bridge cranes up to 1,360 kg (3,000 lbs) and jib cranes up to 907 kg (2,000 lbs)

Handling Devices

- Custom and standard solutions and devices including clamping, vacuum, probing rotary action handlers and hook/trap action to overcome your material handling challenges
- Vacuum load capacities from 27-136 kg (60-300 lbs) and clamp load capacities from 27-45 kg (60-100 lbs)

ARO – Three letters. 80 years. One goal.

Safety is Our top priority.

Ingersoll Rand (NYSE:IR) advances the quality of life by creating and sustaining safe, comfortable and efficient environments. Our people and our family of brands—including Club Car®, Ingersoll Rand®, Schlage®, Thermo King® and Trane®—work together to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, secure homes and commercial properties, and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. Ingersoll Rand is a \$14 billion global business committed to a world of sustainable progress and enduring results.
